

**Route:** "The Date" 5.10a, a fully bolted 3 pitch sport route, 80 m long

**Location:** Left Pillar of Pulpit Rock

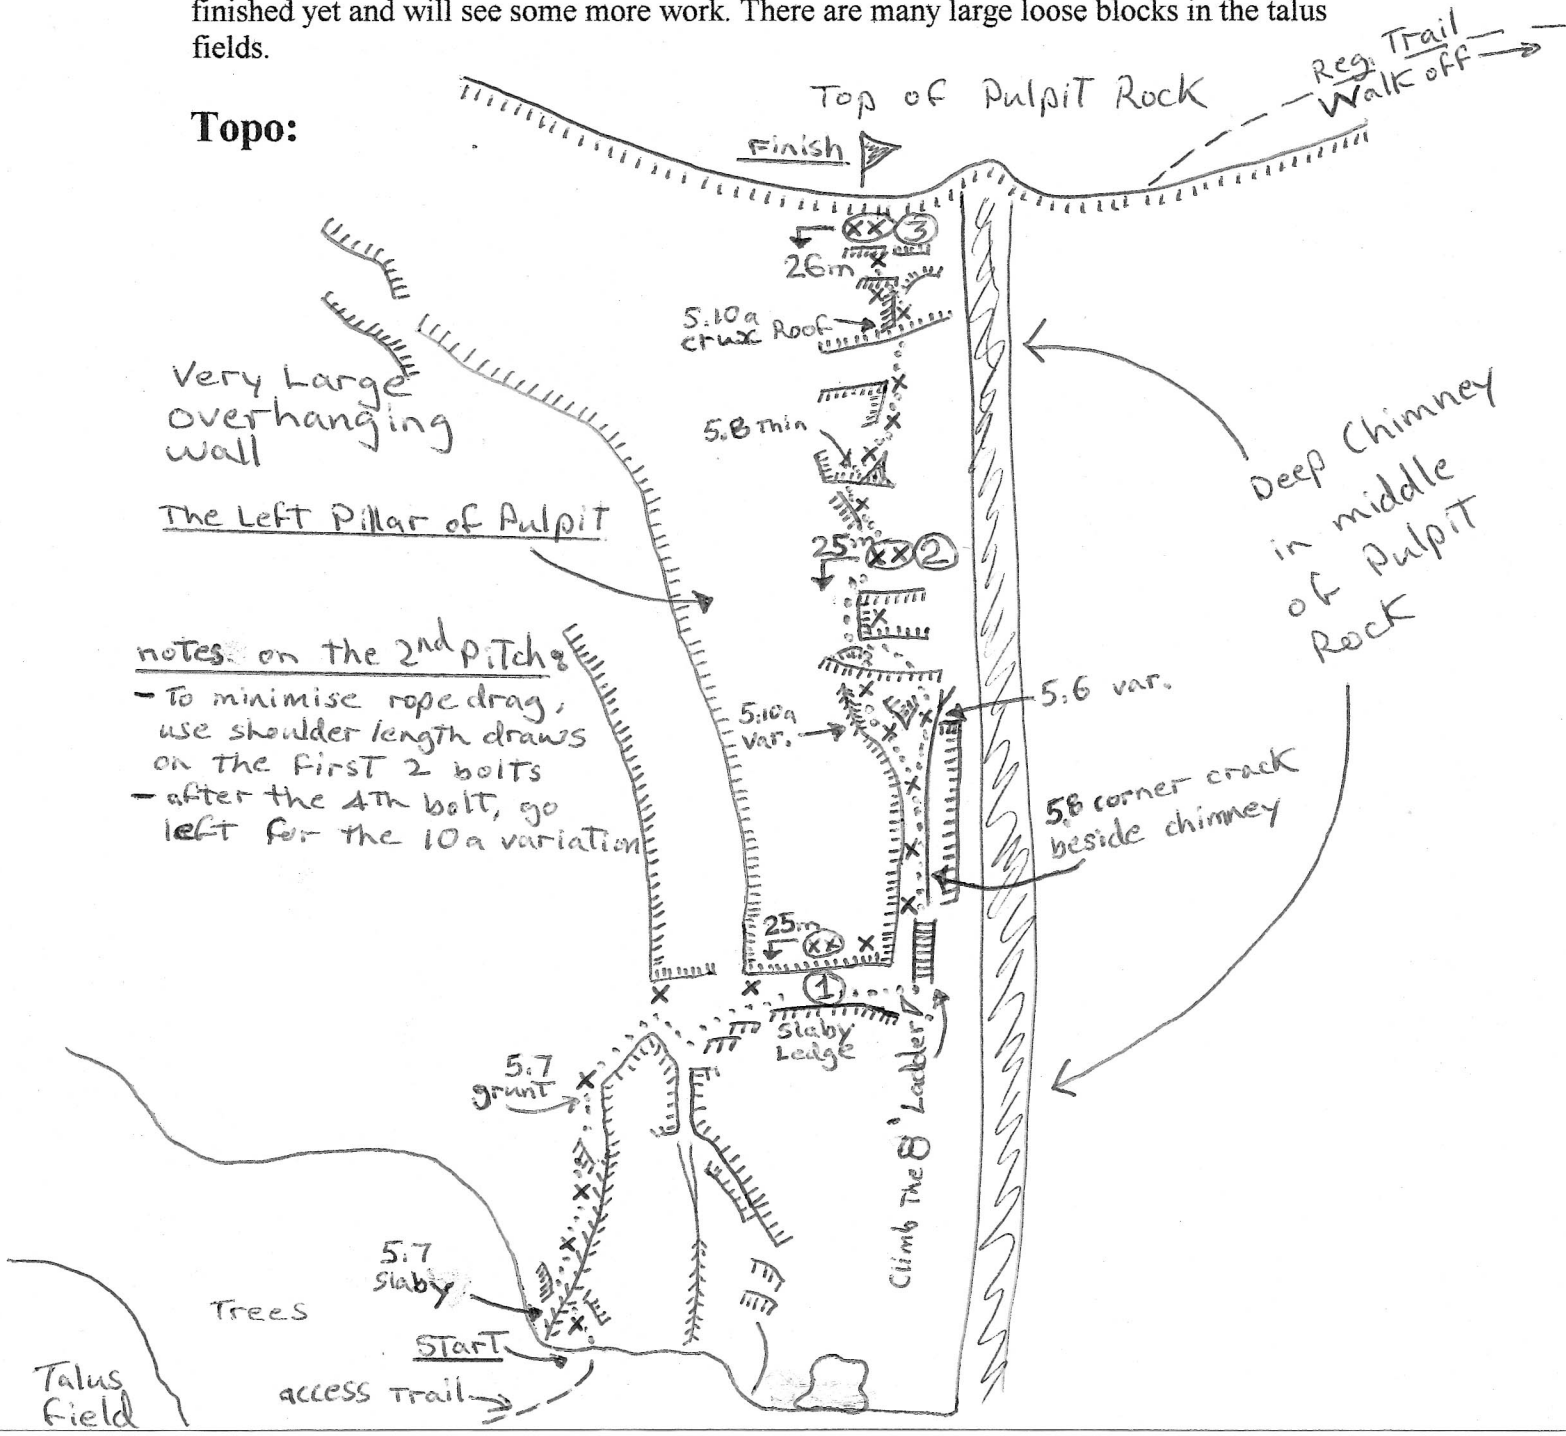

**F.A.:** D. Lussier, M. Terlingen, May 2008

**Gear Required:** 1X 60m rope, 8 draws (incl. 2 long ones), 3 locking binners, Helmet, Etc.

**Access:**

To get to the climb, follow the regular Pulpit rock trail for 20-25min of steady moderate walking. The top of Pulpit rock will become clearly visible for the first time. At the next switch-back, take a faint climber's trail heading west and contour below Pulpit rock. The trail becomes obvious and is well flagged in orange 20m from the switch-back. Follow this across and up talus fields for 10-15min to the base of the route. The trail is not totally finished yet and will see some more work. There are many large loose blocks in the talus fields.

**Topo:**

Very Large overhanging wall

The Left Pillar of Pulpit

notes on the 2nd pitch  
- To minimise rope drag, use shoulder length draws on the first 2 bolts  
- after the 4th bolt, go left for the 10a variation
